

and enforcement of Sub-Decree 133. The Sub-Decree is enforced through joint efforts, led by the Ministry of Health and in conjunction with the Ministry of Commerce, Ministry of Information, and Ministry of Industry and Handicraft. Effective monitoring and enforcement of the Sub-Decree requires taking action against violators. Doing so will ultimately result in better prospects and futures for the children of Cambodia. We applaud the continued dedication and commitment of the Royal Government of Cambodia and the Ministry of Health in their efforts to protect and promote children's wellbeing and nutrition, especially during this difficult time of global COVID-19 pandemic.
